ABOUT THINKERBELL LABS PVT LTD

Thinkerbell Labs Pvt. Ltd. is a tech-driven organisation building innovative, accessible solutions in efforts to make education inclusive. Our current focus is to make products that help improve learning outcomes for the visually impaired.

Challenge: Build Innovative & accessible solutions by optimizing product development time, understanding manufacturing feasibilities during early development stages to make products that help improve learning outcomes for the visually impaired.

Solution: Using SOLIDWORKS Design Software there was a flexibility to quickly develop ideas into realistic models. SOLIDWORKS has been a one stop solution. Plastic part design made absolutely easy which helped us to create products in line with the injection moulding requirements. Realistic visualization of the product to understand better even before manufacturing.

Benefits: SOLIDWORKS has enhanced the product development approach for "Annie" which has helped a visually impaired student to learn & read, write and type in Braille on their own, while having fun!

Thinkerbell Labs is making education inclusive. Our flagship product, Annie helps the visually impaired learn to read, write and type in braille, on their own. Annie makes learning Braille fun and intuitive through its gamified interactive content. SOLIDWORKS has helped us develop our product with greater flexibility and ease. It allowed us to shorten our development cycles significantly and get our product out in the market faster. Conceptia Konnect has been very easy to work with and we appreciate their customer service.

SOLIDWORKS has streamlined the development process of Annie, the world's first Braille literacy device for visually impaired people learn to read, write, and type in Braille on their own in any medium of instruction.
