# DS SOLIDWORKS

3DEXPERIENCE

WHAT'S NEW IN SOLIDWORKS® 2022— DATA MANAGEMENT
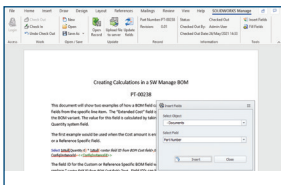

SOLIDWORKS Manage

1 Bill of Material (BOM) Enhancements

- Share BOM data via web link with users who may not have direct access to the system and get feedback via editable fields.
- Create and save BOM Filters to display only necessary information.

Benefits

Share BOM data with external users in an efficient and controlled manner and easily get their feedback.
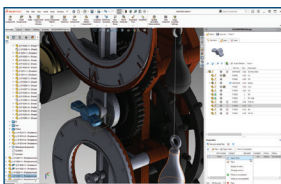

2 Microsoft Office Integrations

- Easily add connected fields, check out, check in, and create new documents with new integrations using Microsoft® Excel, Word, and PowerPoint applications.

Benefits

Work more effectively with common non-CAD document types.

3 SOLIDWORKS Integration

- View and edit tasks associated with SOLIDWORKS files directly in the Task Pane add-in.
- Add comments to selected files and show icons for files that have tasks and comments.
- View additional information in the property card in SOLIDWORKS on the Related files, Configurations, Task, and Comment tabs.

Benefits

Streamline working with files in SOLIDWORKS without leaving the SOLIDWORKS user interface.
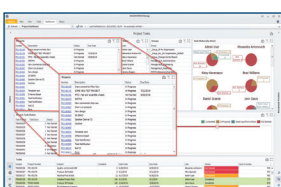

4 Task Enhancements

- Set completed tasks to "Uncompleted" so they can be edited.
- Use the new global setting for creating tasks as public, private, or user's choice.

Benefits

Increase productivity and save time when managing tasks.

5 Web Links

- Automatically create URL addresses as system fields, and include them in notifications, dashboards, and reports providing quick access to relevant information.

Benefits

Quickly access system information via a browser on any device.
